**SECTION 4 - FIRST AID MEASURES:**

**Eye contact:**
Flush with copious quantities of lukewarm water for at least 15 minutes. Do not attempt to physically remove the solids or gums from the eye. Seek medical attention immediately if irritation persists.

**Skin contact:**
Remove contaminated clothing. Wash thoroughly with warm water and non-abrasive soap. Seek medical attention if you feel ill or a reaction develops.

**Inhalation:**
Remove to fresh air and provide water. Seek medical attention if you feel ill or a reaction develops.

**Ingestion:**
Do not induce vomiting. Never give anything by mouth to an unconscious person. Get medical attention.

**Most important symptoms/effects, acute and delayed:**
None known.

**Indication of immediate medical attention and special treatment needed:**
Provide general supportive measures and treat symptomatically.

---

**SECTION 5 - FIRE FIGHTING MEASURES:**

**Suitable extinguishing media:**
Carbon dioxide, dry chemical, water fog or foam. Water can be used to cool fire exposed containers.

**Unsuitable extinguishing media:**
None known.

**Specific hazards arising from the chemical:**
Exposure to combustion products such as carbon oxides, silicone oxides and formaldehyde may be hazard to health.

**Special protective equipment and precautions for fire fighters:**
Self-contained breathing apparatus and protective clothing should be worn in fighting large fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency plan.

---

**SECTION 6 – ACCIDENTAL RELEASE MEASURES:**

**Personal precautions, protective equipment and emergency procedures:**
Follow safe handling advice and personal protective equipment recommendation in Section 8.

**Environment precautions:**
Discharged into the environment must be avoided. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

**Methods and materials for containment and cleaning up:**
Restrict access to the area of the spill. Provide ventilation, NIOSH/MHSA approved respirator and protective clothing. Scrape up sealant and place in container for disposal. Clean area as appropriate since silicone materials can represent a slip hazard. Cleaning may require steam, solvents or detergents. Dispose of saturated absorbent or cleaning materials appropriately, since spontaneous heating may occur. Local, state, provincial, federal laws and regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup.

---

**SECTION 7 – HANDLING AND STORAGE:**

**Precautions for safe handling:**
Handle in accordance with good industrial hygiene and safety practice. Take care to prevent spills, waste and minimize release to the environment.

**Conditions for safe storage, including any incompatibilities:**
Store in an adequately ventilated area under dry conditions between 50°F (10°C) to 77°F (25°C) and keep container tightly sealed when not in use. Do not store with strong oxidizing agents.

**Engineering controls:**

Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations. Use NIOSH/MSHA approved respirators unless local exhaust ventilation is provided or exposures are within guidelines.

**Personal protective equipment:**

Safety glasses with side-protection, impermeable gloves (e.g., neoprene, nitrile, silver shield (R)), coveralls or apron are important in preventing contamination of eyes, skin and clothing. General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Wash thoroughly after handling.
